## SUMMARY

Backend-focused Software Developer with hands-on experience building production-ready applications using Node.js and Express. Strong in REST API development, authentication and authorization, database design, and backend performance optimization. Seeking a backend or full-stack role to build reliable, scalable systems.

## EXPERIENCE

**Next Gen Tech Services (NGTS)** **Jul 2025 – Jan 2026**
*Backend Developer* *India — Onsite*

- Developed and maintained backend services using **Node.js, Express, WebSocket (Socket.io)**, and multiple databases including **MongoDB, PostgreSQL, MySQL, and Cosmos DB**.
- Built scalable RESTful APIs and implemented secure authentication and authorization using **JWT** and **bcrypt**.
- Integrated and maintained third-party services including **Fast2SMS**, payment gateways such as **Razorpay** and **Easebuzz**, **BBPS providers (Cyrus)**, and healthcare APIs, handling authentication, retries, error handling, and secure data exchange.

**Solvimate** **Apr 2025 – Jul 2025**
*Backend Engineer Intern* *India — Remote*

- Contributed to backend development by designing scalable database schemas, implementing backend business logic, and integrating RESTful APIs to support smooth system workflows.
- Played a key role in the **Teja Tool** project by building a Translation Management System that enabled submission, review, approval, rejection, and rework workflows for translators.

## PROJECTS

### AMICA AI

- Contributed to backend development of an AI-driven application by building scalable APIs and managing server-side business logic.
- Implemented API-based AI/chat workflows and backend data processing to support MVP-stage application functionality.
- Developed backend services using **Node.js, Express, and Azure Cosmos DB (MongoDB API)** to ensure reliable and scalable application behavior.

### Insaaf AI

- Developed backend services for a conversational AI platform enabling authenticated users to interact with an AI-powered chatbot.
- Implemented secure authentication, request handling, and chat workflow management using **Node.js, JWT, and PostgreSQL**.
- Worked closely with stakeholders to gather functional requirements and implemented scalable backend solutions aligned with business goals.

### Reanent

- Worked as a backend developer on a MERN-based property management platform enabling owners to list properties and tenants to manage tenancy workflows.
- Designed scalable database schemas and built RESTful APIs to handle tenancy lifecycle, documents, payments, reminders, and notifications.
- Integrated third-party services including **BBPS APIs** for bill payments, **Razorpay** for online transactions, and **Firebase** for real-time notifications.
- Collaborated directly with clients to understand business requirements and translated them into efficient, scalable backend solutions.

## TECH SKILLS

| | |
|---|---|
| **Programming Languages** | C, C++, Java, JavaScript, Python |
| **Backend Technologies** | Node.js, Express.js, REST APIs, WebSocket (Socket.io), JWT, Bcrypt |
| **Databases & Caching** | MongoDB, PostgreSQL, MySQL, Azure Cosmos DB, Redis |
| **Frontend (Basic)** | HTML5, CSS3, Tailwind CSS, Bootstrap, React |
| **Tools & Platforms** | Git, GitHub, Docker, Postman, Linux, VS Code |
| **Concepts** | Authentication & Authorization, API Design, Database Design, MVC Architecture |

## EDUCATION

**Vikram University** **2022 – 2024**
*Master of Computer Applications (MCA)* - ***CGPA: 8.40*** *Ujjain, India*

**Makhanlal Chaturvedi National University** **2019 – 2022**
*Bachelor of Computer Application (BCA)* - ***CGPA: 8.33*** *Bhopal, India*
